

## Kenogami Dam BY-Pass :

Fig. 1: Location in relation to Longlac

### **Project Purpose and Rationale**

- Ontario Power Generation has obtained a lease for an area of crown land surrounding the Kenogami Dam site.
- Due to concerns by OPG of potential liability this land has been closed to public use.
- This portion of land contains an access route used by the public to access the Kenogami River for fishing and camping opportunities. The provincial snowmobile trail system also used this access road to link its trail system between Longlac and Nakina.
- The proposed by-pass trail is about 400 metres long

### **Background**

- This issue has received extensive consultation with the Geraldton Area Natural Resources Advisory Committee (GANRAC)
- The proposed access trail shown in purple in Fig 2 is the result of these negotiations

### Detailed Description of the Project Proposal

- This trail will be constructed in cooperation with OPG, OMNR, Long Lake Forest Products & GANRAC.
- It will maintain the existing access around the portion of private property linking up with the road that extends beyond.
